

## Car service for Ellora tourists

Good news for tourists in the new year. A battery-powered car service is set to launch in February 2022 at the famous Ellora Cave in Maharashtra. It is one of the most important archeological sites in India, covering an area of more than two kilometers. Tourists had to visit it on foot for so long. The administration has decided to launch this service keeping in mind this difficulty. In this regard, the superintendent of the organization Mr. Milan Kumar Chaule said that a total of 20 vehicles will run for the tourists throughout the day. It is proposed to construct 5 temporary shelters for vehicles.
